Reading Practice

Introduction

Reading is always a problem for drummers of all ages, however I believe that it is not a problem if the basic issues are addressed right from the beginning.

This set of 20 “Reading Practice” sheets is designed to help students learn the basics of reading music, with very little to confuse them, so they can concentrate on reading and counting the note types accurately.

There is quite deliberately no dynamics, accents or articulation markings on them, and they are all in 4/4 time signature. I believe that students can learn these other things independently afterwards, but it is firstly of utmost importance that they know the note types and they can count rhythms correctly first.

Many drum teachers probably disagree with me on this, indeed I would have myself when I first started teaching, however in my experience of teaching drums I have found this to be the most effective way of teaching students to read music.

In this package have also supplied the snare drum solos and reading expansion sheets which deal with dynamics, accents and other time signatures.

**Tips for teaching rhythm reading….**

Students must COUNT OUT LOUD!.. this is vital to being a good reader..

I have not written in counts on any of the sheets, however they can be written in if the student is having trouble learning them.

I insist that the student gives a note-perfect performance of each exercise before they can proceed to the next sheet, without any assistance from me.

I also sign off each exercise as the student completes it, this gives them a sense of achievement, and a goal to complete the whole course.

Hi-Hat Patterns

This is a list of Alternate Hi-Hat Patterns that can be applied to most of the previous patterns.

**Crotchets**
Play on Loose Hi-Hats or the Ride

Example
(sheet 1, number 3)

**Semiquavers**
Can be played with one hand, or both depending on the tempo

**Accents**
Very Important in getting a good feel!

**Hi-Hat Openings**

These are Just an example - There are Hundreds of other cymbal patterns that can be played over these exersize sheets.

Have Fun!....

Others

Basic Pattern:
Written in 4/4 Time:

Basic Pattern written in 12/8/ Time

Variations
These exercises are designed to develop the independence of both the left hand and the bass drum.

Step 1) Play the second bar only, with the snare drum against the ride cymbal... very slowly.

Step 2) Then add the hi-hat on 2&4 of every bar, and play the exercise as written, bringing in and out the snare drum.

Step 3) Learn the exercise playing the snare drum line on the bass drum.

Hi-Hat should be played with the left foot on beat 2 & 4 of every bar.
Also try playing these exercises alternating bars between snare drum and bass drum.
Don’t forget the Hi-Hat!

In these exercises, the cymbal always lines up with the third note of the triplet, as that is the way the quavers are always played in swing, so that is why the notation looks a little strange.
Swing Independence Exercises copyright 2000 Kevin Tuck

http://www.worldpercussion.com.au
These Exersizes are simply melodic rhythms, which can be played against the ride cymbal pattern. They are a good exercise to develop independence, but remember that you would never actually play all of these notes when playing a jazz tune, as this would make it too "crowded".

"Some of these rhythms are taken from the melodies of famous jazz tunes...see if you can guess which ones they are!!

When encountering this type of figure, the drummer's role is to keep the time going underneath the figure, and lightly compliment it with the snare and bass drums. It is important not to over-emphasise every section figure that is found in a chart, or the drums will be too "busy" and take away from the section that is playing.

An ensemble figure is usually written on the staff, replacing the time slashes, and noteheads are replaced by slashes, and usually have accents over the most important notes. When encountering this type of figure the drummer's role is to:

- Stop the time and play the figure with the band, crashing cymbals on the important notes.
- Play a "set-up" which leads to the figure

A set up usually consists of one main note immediately preceding the figure, with an extra few notes to embellish it.

Orchestration:

A crash cymbal is not generally strong enough by itself to emphasise the figure, so it is usually played in unison with the snare or bass drums.

“If playing the figure with the snare & crash the set up is usually played with the bass drum, and if playing the figure with the bass & crash then the set up note would be played on the snare drum.

Swing Figures
Generally when a figure is on the beat, the setup should be played on the beat immediately before it, and extra notes can be added before the set-up note to embellish it.

Here is a single note ensemble figure and some possible set-ups for it:

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]

\[ \begin{array}{c|c|c|c|c} & \cdot & \cdot & \cdot & \cdot \\ \hline & \cdot & \cdot & \cdot & \cdot \\ \hline \end{array} \]
Setting up one note ensemble figures (figures off the beat)

When a figure is off the beat, the setup note should be played on the beat which the figure is after, and additional notes can be added before the main setup note.

Here is a single note ensemble figure and some possible set-ups for it:

If the figure is written as a shorter note, and/or written with a capped accent ( ), then avoid playing a crash cymbal, unless you can choke it. Use the hi-hat or a splash cymbal to give a shorter sound.

one bar figure examples
The Bossa Nova

The Bossa Nova originates in Brazil, and has become the most popular of all the Latin Styles. It is essential for the Jazz and Rock Drummer to have a strong understanding of the Bossa Nova style, and be fluent in the execution of it. The Bossa Nova is a indispensable part of Jazz Music, and also appears in Ballads and Pop songs.

The main difference between the Bossa Nova and other straight 8th Patterns is in the Rim Click or Bala Part, which is a type of 'Clave'

This is added to a brazilian 'Samba' bass drum line, which fits with the Bass Lines of the music.

The Hi-Hat is also added on 2 & 4 of each bar, to create a underlying pulse with the bass drum.

Add some relaxed Quavers on the Hi-Hat or Ride Cymbal and we have the Basic Bossa Nova Pattern.

As with other Latin music, sometimes the 'Clave' is reversed, so that the second bar is placed first, and the first bar second. This means that all fills have to fit in with this phrasing of the pattern. Drummers need to be fluent in both Versions of the Bossa Nova 'Clave'

The Cymbal Pattern can also be played using a brush on the Snare Drum

The Cha Cha

The cha-cha-cha is one of the simplest, and most popular of the Cuban rhythms. Cha-Cha-Cha, or Cha-Cha as it is more commonly known is a dance rhythm with an even accentuation of four beats in a bar. The simple rhythm and 4/4 feeling makes it very compatible with other types of music such as Rock. The rock group Santana are well known for incorporating these types of rhythms into their music.

As with all Latin rhythms, the best way to work them out on the drum kit is to look at the traditional hand percussion instruments that are used in the style.

The Basic Rhythm performed on Claves, Maracas and Congas (3:2 Clave):

Adapted to the drum kit:

In Reverse (2:3) Clave:

Variations:

When there is a conga player and a drum kit player, avoid doubling the conga part with the Tom-Toms. This gives the drummer a chance to reinforce the feeling of four in a bar with the RimClick.

Alternatively, crotchetts can be played on the Bell of the Ride Cymbal or Cowbell.

Suggested Listening
Arturo Sandoval, Danzon, Dance on! Track 6 "Danzon" and Track 8 "Guajiros"
Santana, The Best of Santana, Track 1 "She's not there" and Track 9 "Oye Como Va"

Copyright 1998 Kevin Tuck
This copy licensed from World Percussion http://www.worldpercussion.com.au
The Mambo is also from Cuba, but is slightly more complex than the cha-cha, due to the more intricate cowbell patterns. The Clave and Conga are more or less the same as the Cha Cha, but played faster, and the rhythm has more of a feeling of two beats in a bar, rather than four.

The Basic elements of a Mambo in a percussion section:

---

The Basic pattern: Adapted to the Drum Kit:
Bell of Ride Cymbal or Cowbell

---

Variations of the Bell Pattern
The Samba

Like the Bossa Nova, the Samba has its origins in Brazil, but like the other Latin styles, it has undergone a lot of changes in its history. The Samba is fundamentally a Dance rhythm - it’s pulse and groove should make you want to get up and jump onto the dance floor. All sambas are in some way related to the "Samba Batucada" or "Street Samba". This is most famous from the Carnival in the City of Rio de Janeiro.

At the heart of The Samba Batucada is the "Surdo" (a type of Bass Drum). Its basic rhythm consists of a muted tone on beat 1 and an open tone on beat 2.

\[ \text{\includegraphics[width=0.5\textwidth]{samba_batucada.png}} \]

This is usually enhanced with some quavers as follows:

\[ \text{\includegraphics[width=0.5\textwidth]{samba_quavers.png}} \]

There is a large amount of Brazilian Percussion Instruments which appear in the "Samba Batucada, Ago-go Bells, Triangles, Snare Drums, Tambourines etc. One of the most important "Chocalho" which plays:

\[ \text{\includegraphics[width=0.5\textwidth]{samba_chocalho.png}} \]

The simplest way of Performing a Samba on the Drum Kit is simply to play the Samba Bass Drum Part with the Bass Drum and The Shaker part on the Hi-Hat:

\[ \text{\includegraphics[width=0.5\textwidth]{samba_drumkit.png}} \]

The other common way of playing this kind of samba is with Brushes on the Snare Drum, as follows:

\[ \text{\includegraphics[width=0.5\textwidth]{samba_brushes.png}} \]

Other rhythms can be incorporated into the snare drum part to create more rhythmic interest and excitement.

\[ \text{\includegraphics[width=0.5\textwidth]{samba_variations.png}} \]

Cont. on next page................
The Hi-Hat is also traditionally added on Beats 2 and 4 by most Jazz Drummers playing sambas, as this makes the beat more steady.

At Slower Tempi, the ride cymbal or hi-hat could be played with one hand, leaving the left hand free to play samba rhythms on the snare drum. In softer songs the ride can be played with a brush, and the snare can be played with a mallet.

When playing a little faster, the ride can still be used, playing like a "Straight swing" kind of pattern, over the top of the bass and Hi-Hat.

Another way of using the Ride Cymbal in a samba is to improvise a cowbell type pattern on it. It is important to keep the Bass and Hi-Hat going in a samba style, so that it doesn't turn into a Mambo.

Suggested Listening:
Santana - The Best of Santana - particularly Tracks 3 "carnaval" and 6 "camba pa ti"
Paul Simon The Rhythm of the Saints, Track 7, and Graceland
